

## CREATE IBM WATSON IOT PLATFORM AND DEVICE

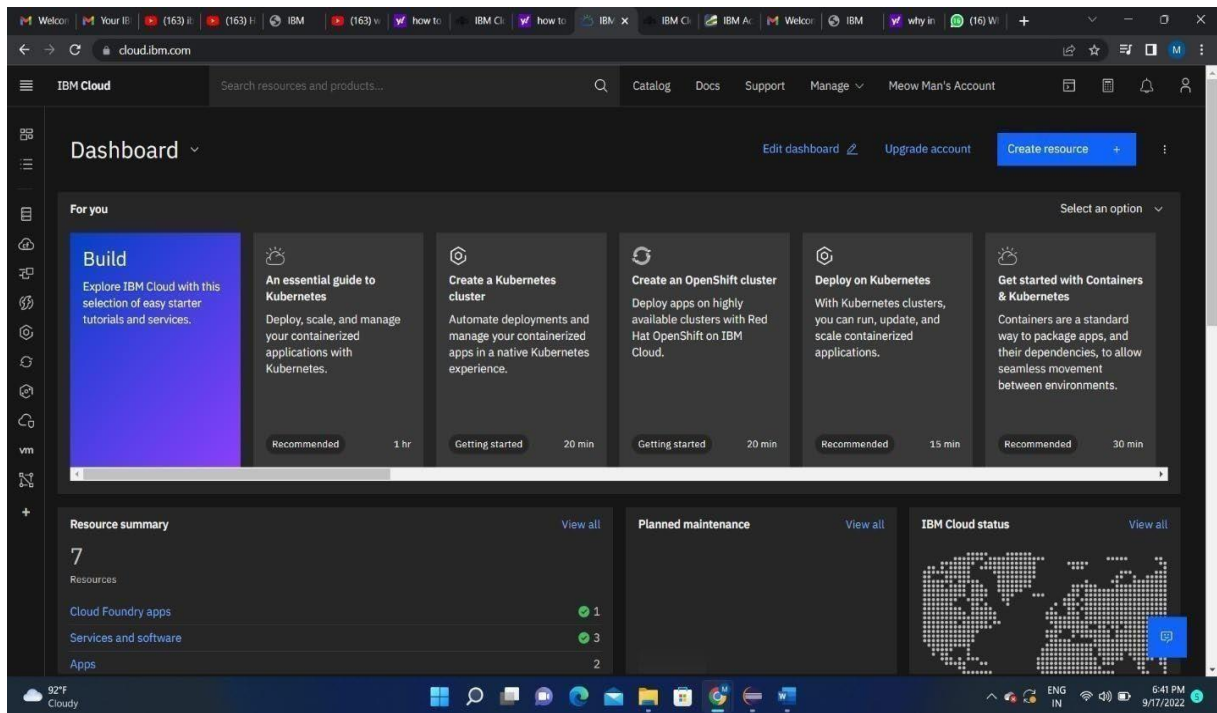

Date	22-10-2022
Team ID	PNT2022TMID11093
Project Name	IOT based safety gadgetfor child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	SRI RANJANI.K SOWNDHARIYA.P.R UTHRA.S SWARNA.E

### STEPS:

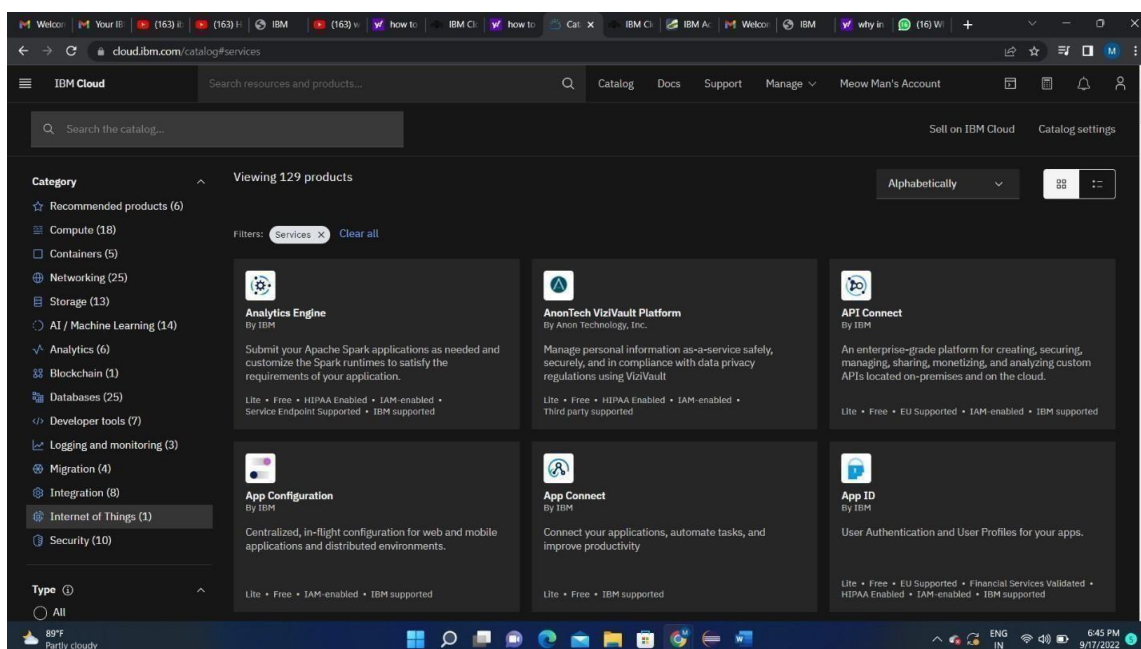

1. Firstly create an IBM cloud account with IBMid and password

## 2. Home page of IBM cloud

## 3. Click on the catalog on the top

## Click on IoT in the category mentioned

The screenshot shows the IBM Cloud IoT Platform page. The 'Create' tab is active, displaying a 'Select a location' dropdown menu with 'Dallas (us-south)' selected. Below this, there's a 'Select a pricing plan' section with a table of plans. The 'Lite' plan is highlighted, showing features like up to 500 registered devices and 200 MB of data storage. A warning message on the right states: 'Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.' The 'Create' button is disabled.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

## 4. If already a lite is present delete it else u can't create another

The screenshot shows the 'Configure your resource' section of the IBM Cloud IoT Platform page. The 'Lite' plan is still selected. The 'Service name' field is set to 'Internet of Things Platform-bb'. The 'Resource group' is set to 'Default'. The 'Create' button is still disabled. The warning message on the right is the same as in the previous screenshot.

Configure your resource

Service name: Internet of Things Platform-bb

Resource group: Default

5. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with agreements and then click on create

### Internet of Things Platform

This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.

6. Internet of Things Platform Child\_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

The screenshot shows the IBM Cloud IoT Platform console. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Docs, Support, Manage, and Meow Man's Account. The main header displays 'Resource list / Internet of Things Platform-child\_safety' with an 'Active' status and an 'Add tags' link. The left sidebar has a 'Manage' tab selected, with sub-tabs for 'Plan' and 'Connections'. The main content area features a large graphic of a central square with four smaller squares around it, each containing a different symbol (a padlock, a gear, a network, and a person). To the right of the graphic, the text reads 'Let's get started with IBM Watson IoT Platform' followed by 'Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.' Below this, there are 'Launch' and 'Docs' buttons. Further down, a section titled 'Ready for the next level?' shows the 'IBM Watson IoT Platform Journey' with three stages: 'Lite', 'Non-Production', and 'Production'. Each stage has a description and a 'Free' or 'Starts at \$500 per month' label.

Ready for the next level?

IBM Watson IoT Platform Journey

Lite Non-Production Production

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

Free Starts at \$500 per month Includes IBM Service & Support

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected. The main content area displays the 'Current plan' as 'Lite'. Below this, the 'Features' are listed: 'Includes up to 500 registered devices, and a maximum of 200 MB of each data metric', 'Maximum of 500 registered devices', 'Maximum of 500 application bindings', and 'Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed'. To the right, the 'Current usage' is shown as 'N/A' with a note: 'Lite plan services are deleted after 30 days of inactivity.' Below the plan details, there is a 'Change pricing plan' section with a table showing the 'Lite' plan and its features and pricing.

Current plan

Lite

Features

- Includes up to 500 registered devices, and a maximum of 200 MB of each data metric
- Maximum of 500 registered devices
- Maximum of 500 application bindings
- Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed

Current usage

N/A

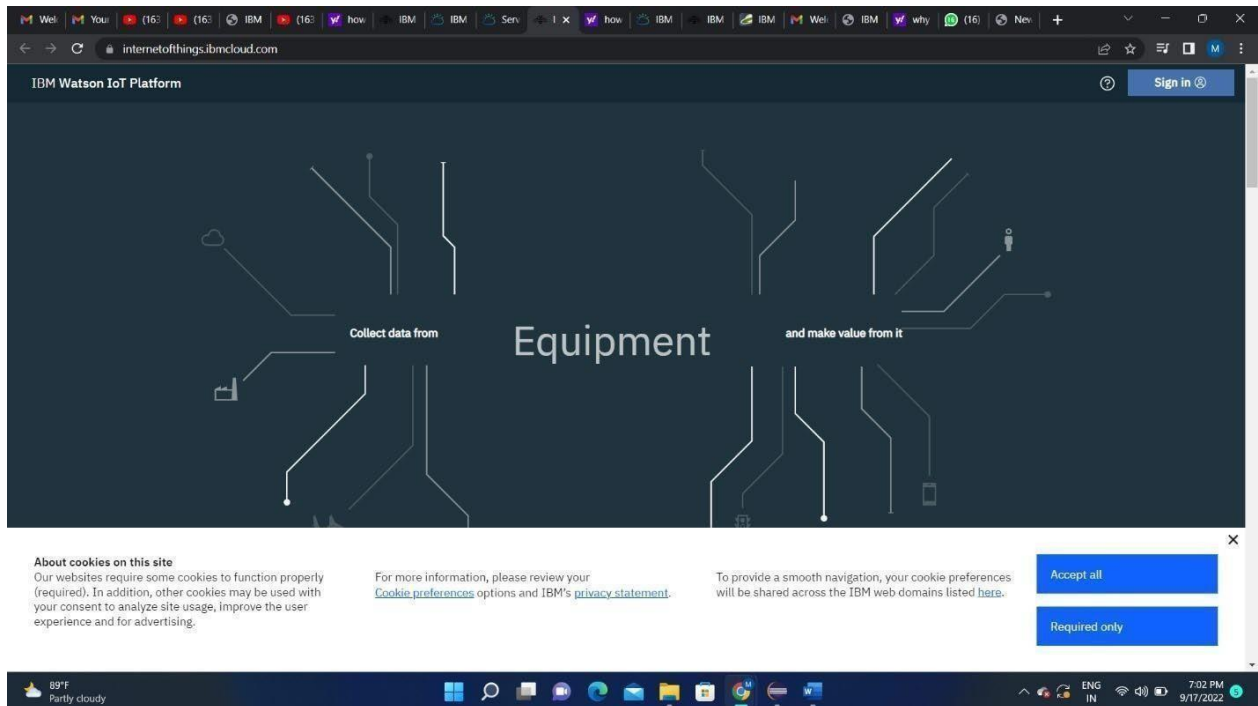

Lite plan services are deleted after 30 days of inactivity.

Change pricing plan

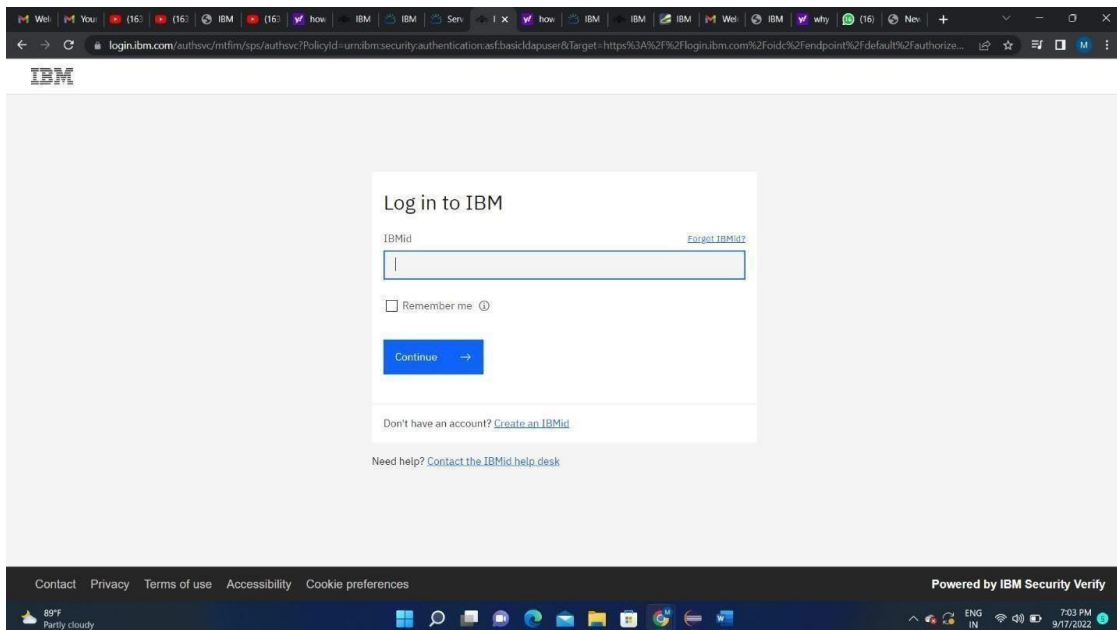

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

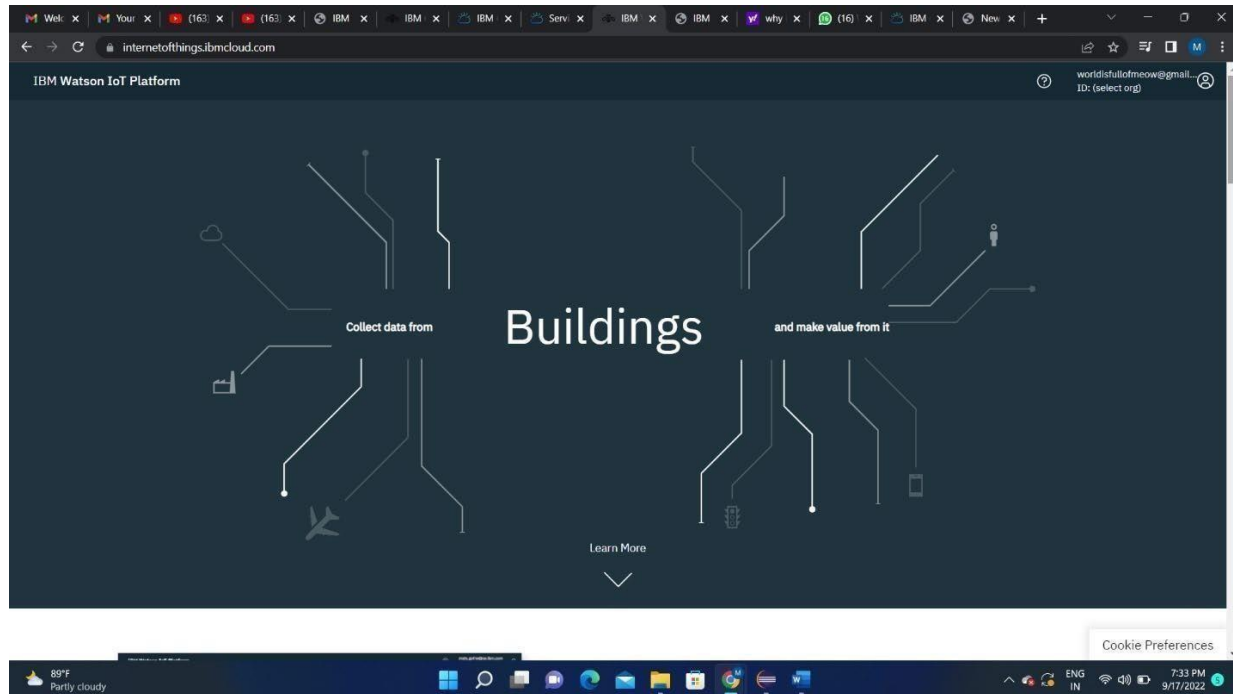

7. Clicking on the launch button in the manage tab, it will open to this

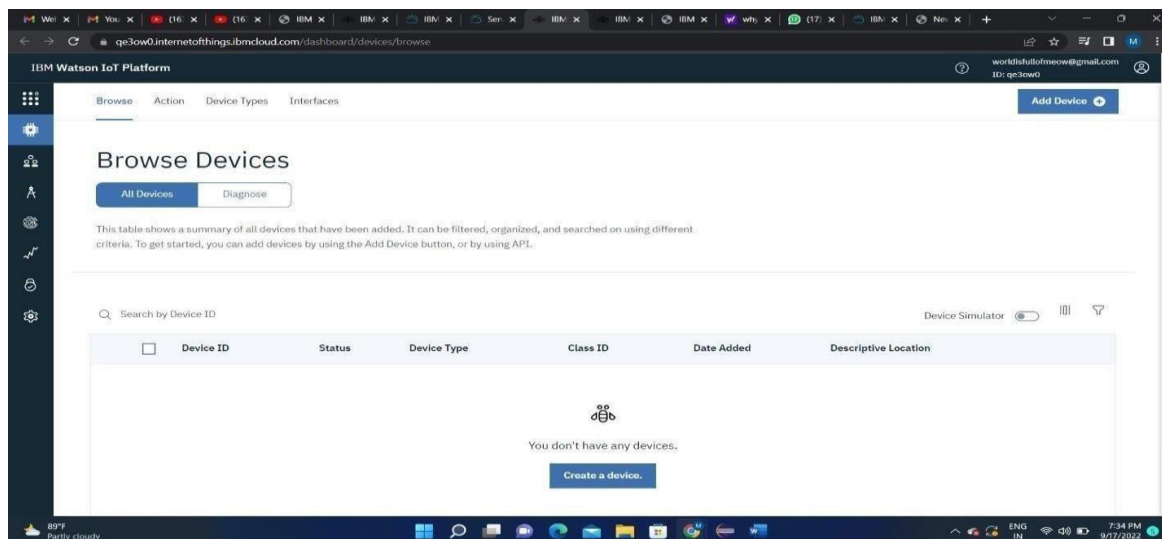

8. Enter the details to sign in to the Watson Cloud to create a device

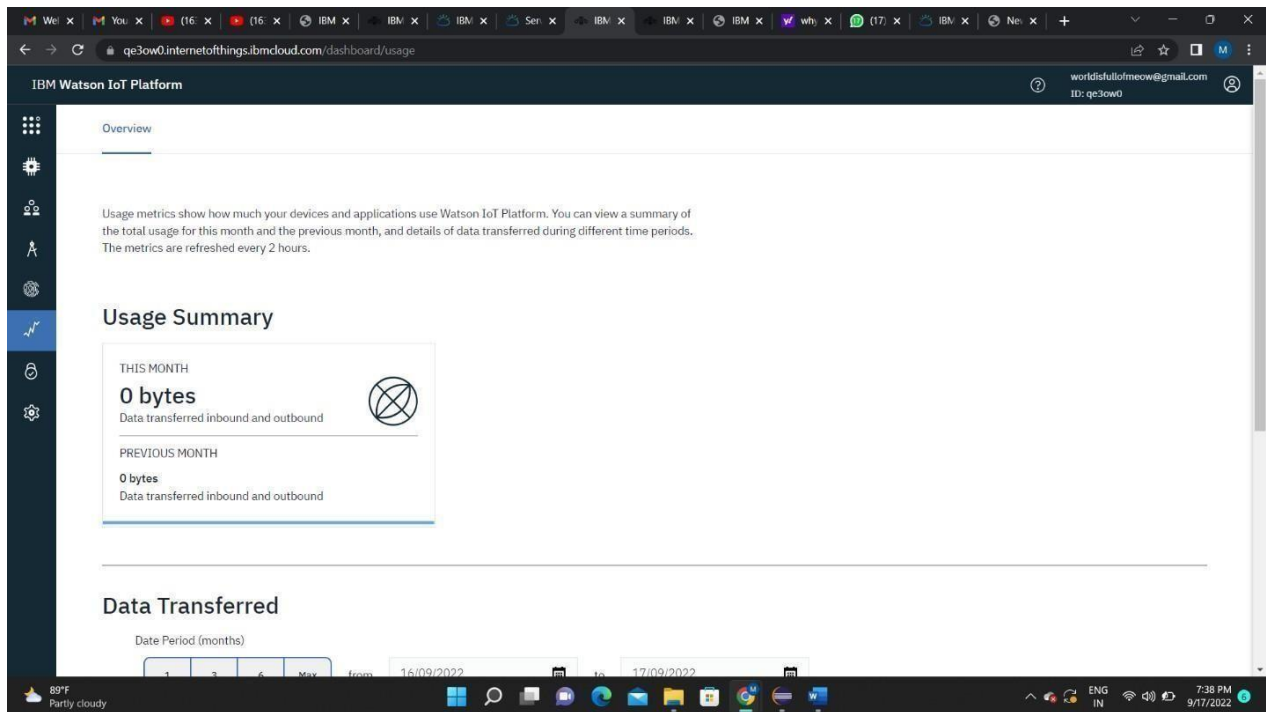

9. Once logged in the name will be displayed and it goes back to the first page

10. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

## 11. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

## 12. The member tab is add the teams members to work in the platform

The screenshot shows the 'Browse Members' page in the IBM Watson IoT Platform. The page title is 'Browse Members'. Below the title, there is a search bar with the placeholder text 'Type the member email to search for'. Below the search bar, there is a table showing the members of the organization. The table has columns for 'Email Address', 'Name', 'Role', 'Added By', and 'Expires'. There is one member listed: 'worldisfullofmeow@gmail.com' with the role 'Administrator'. The page includes a sidebar with navigation icons and a top navigation bar with the user's email and ID. The browser address bar shows the URL 'qe3ow0.internetofthings.ibmcloud.com/dashboard/members/browse'.

**Browse Members**

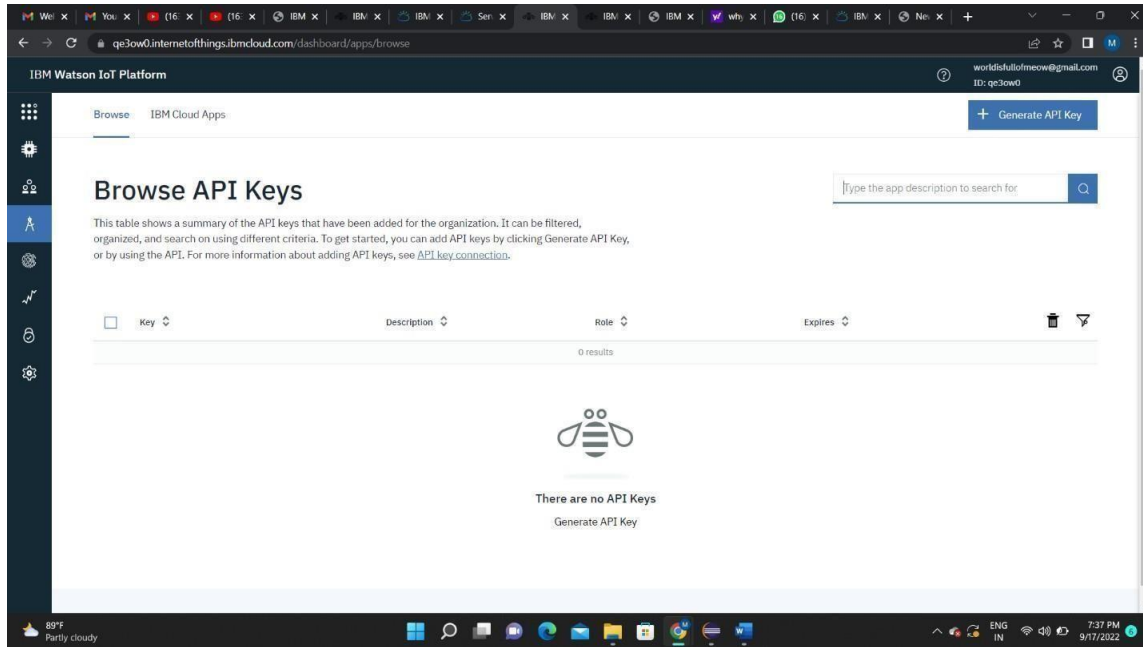

Type the member email to search for

This table shows a summary of the members of the organization. It can be filtered, organized, and search on using different criteria. To get started, you can add members by clicking Add Members, or by using the API. For more information about members, see [Managing user access](#).

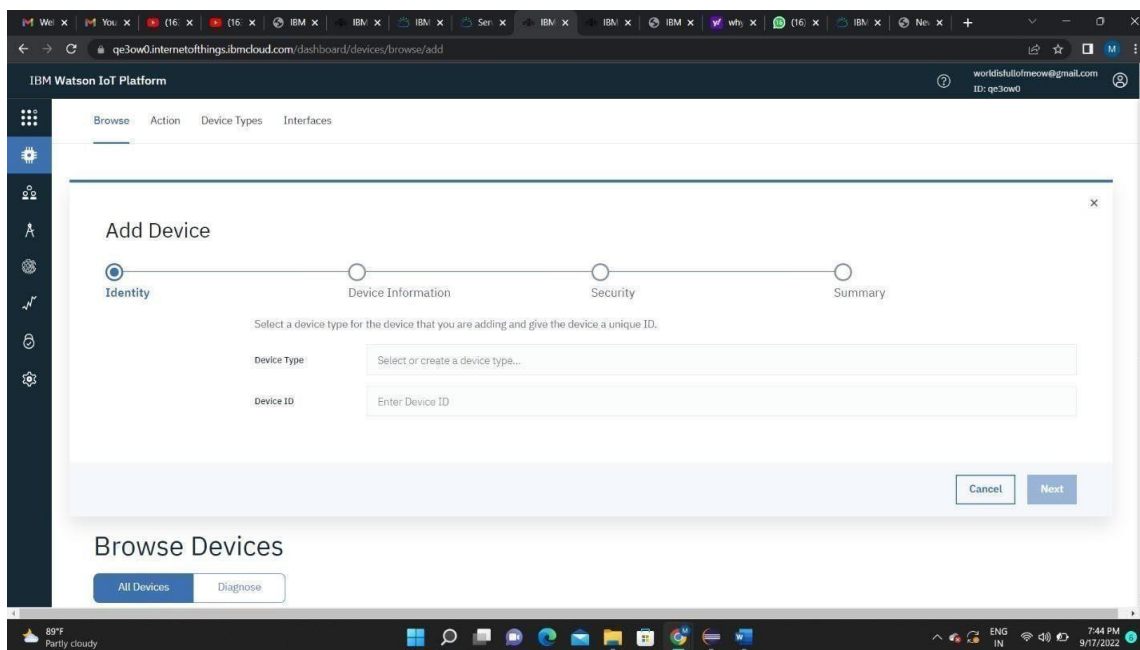

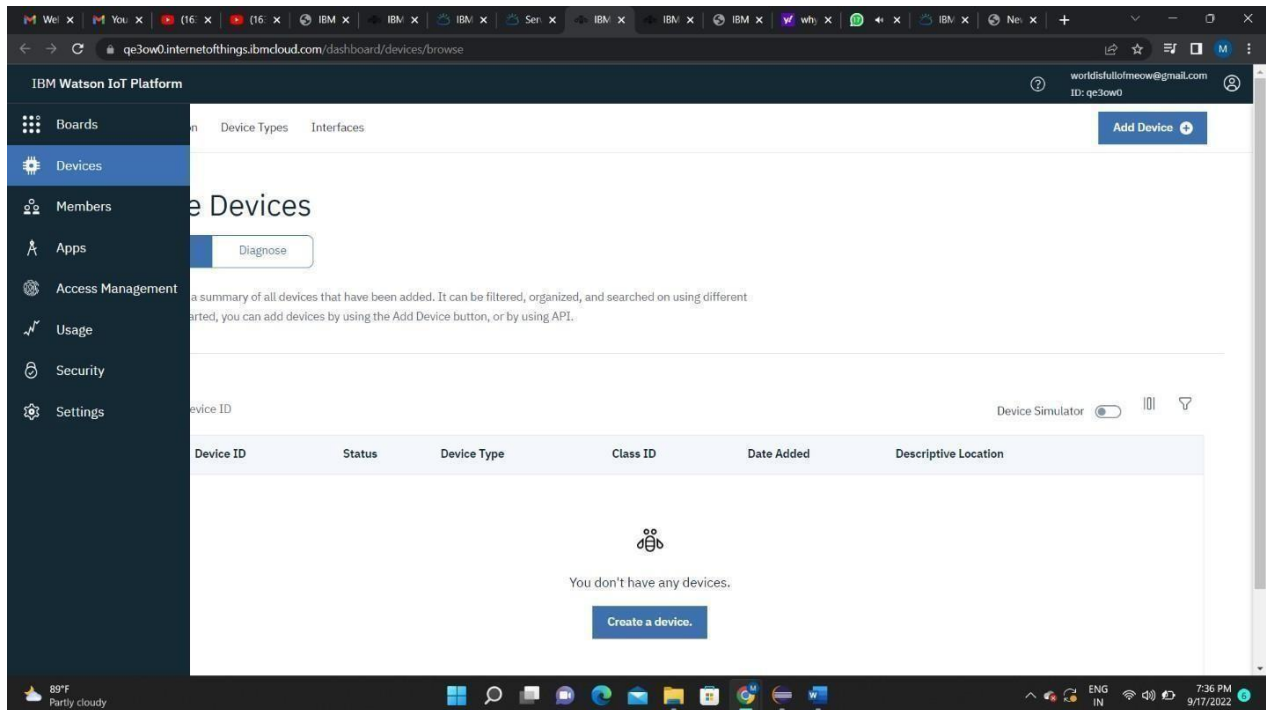

<input type="checkbox"/>	Email Address	Name	Role	Added By	Expires	
1 result						
<input type="checkbox"/>	worldisfullofmeow@gmail.com	worldisfullofmeow@gmail.com	Administrator	-	-	

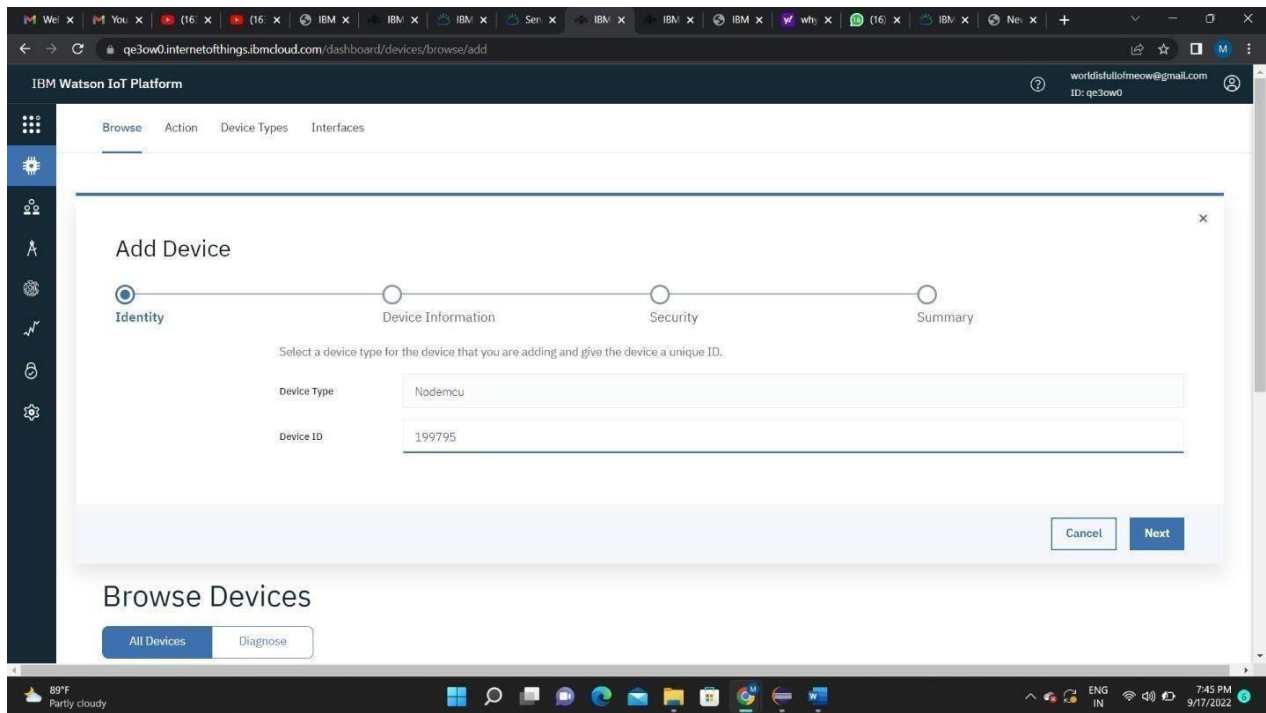

13. This tab is used when you want to connect to some other platform and to integrate with other services.

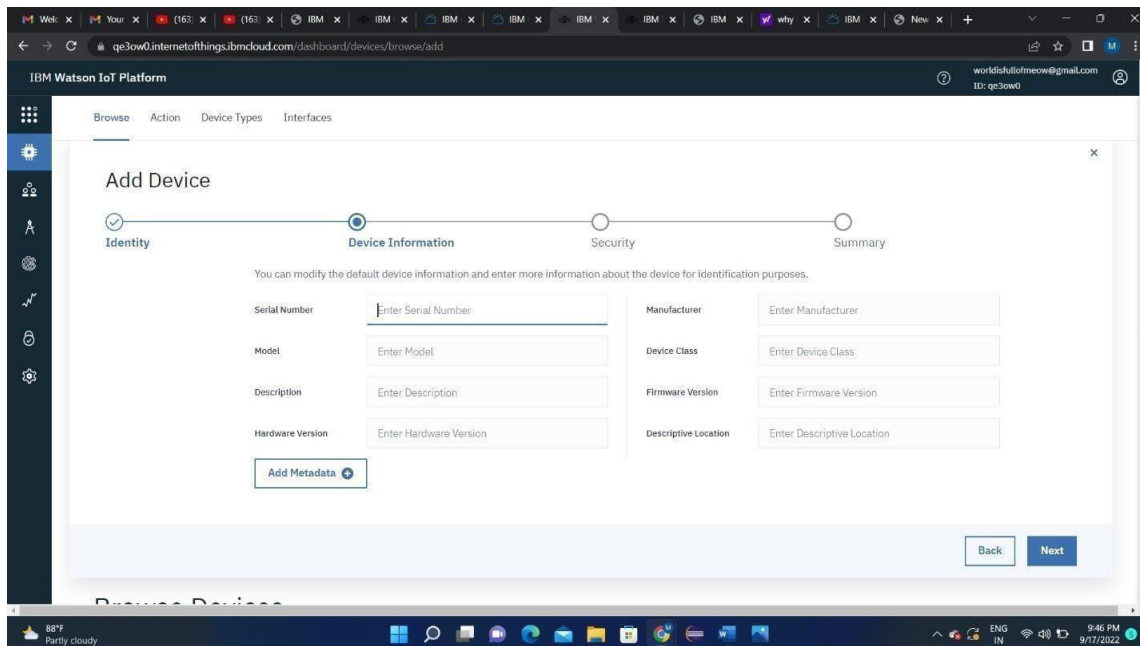

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

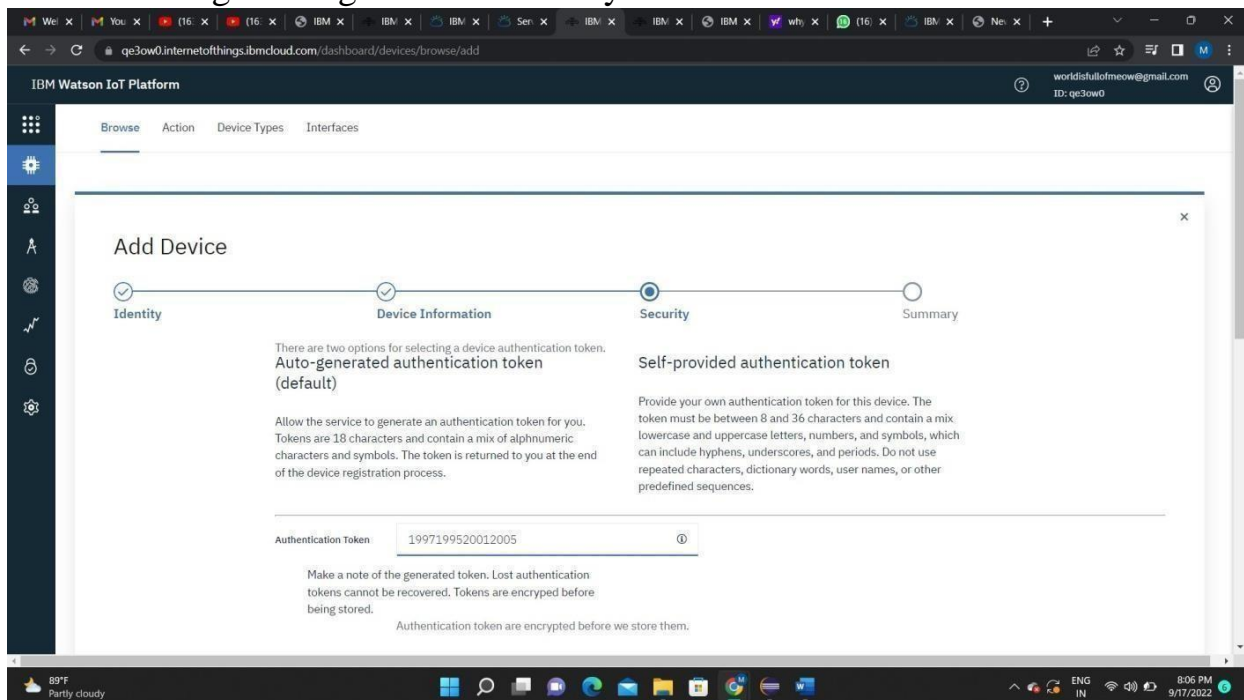

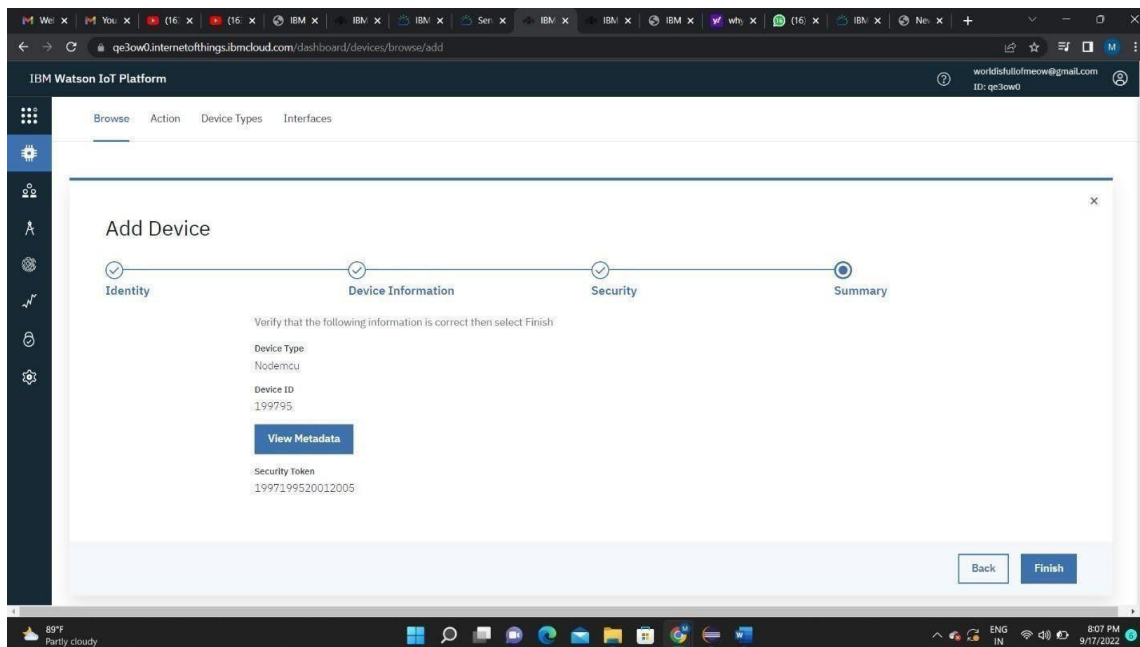

15. This page to enter extra details and of the hardware

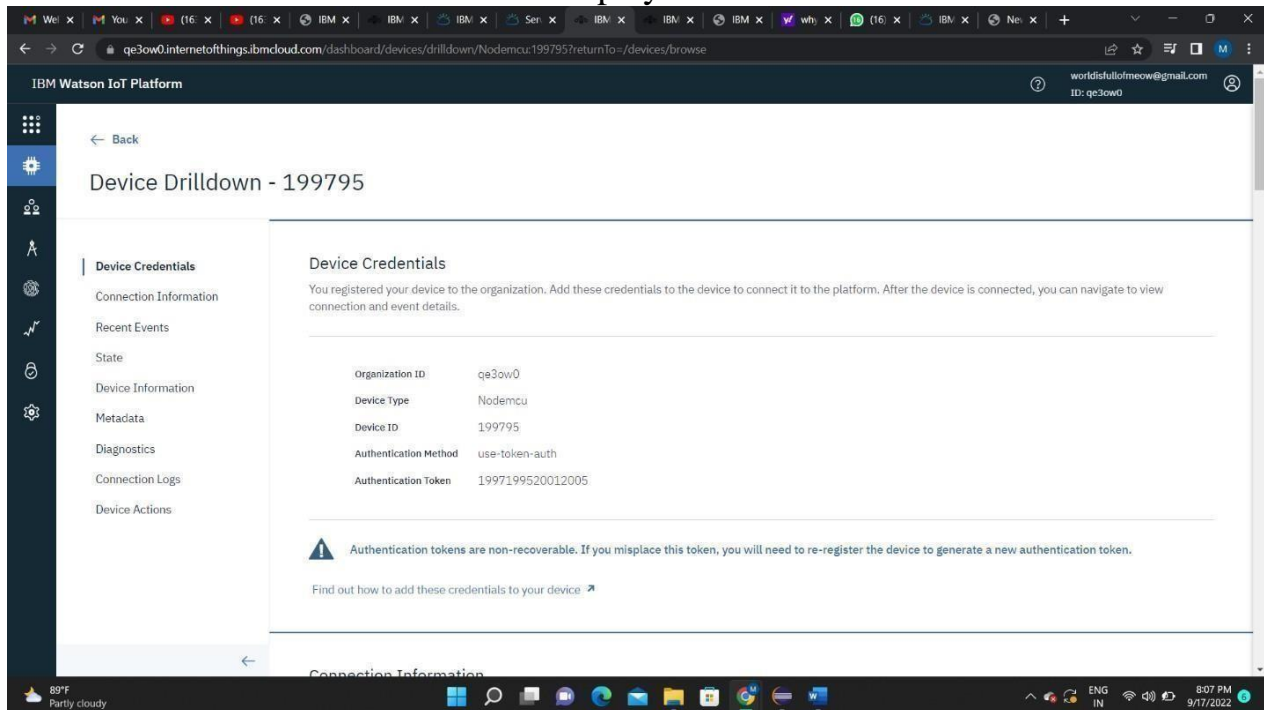

16. Clicking next it goes to the security where we do authentication token id.

17. Clicking on next it goes to the summary of the device then click finish

## 18. The device credentials will be displayed with all the details

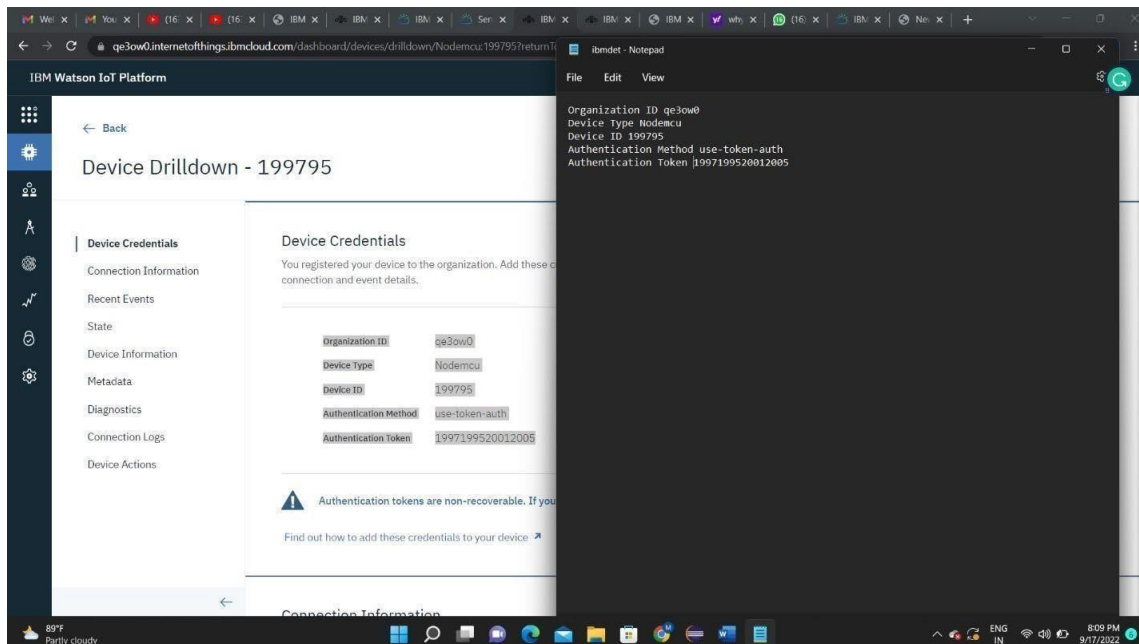

The screenshot shows the IBM Watson IoT Platform interface. The left sidebar contains navigation icons for various functions. The main content area is titled 'Device Drilldown - 199795'. Under the 'Device Credentials' tab, a table displays the following information:

Organization ID	Device Type	Device ID	Authentication Method	Authentication Token
qe3ow0	Nodemcu	199795	use-token-auth	1997199520012005

Below the table, a warning message states: 'Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token. Find out how to add these credentials to your device'.

## 19. Safe the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

The screenshot shows the same IBM Watson IoT Platform interface as before, but with a Notepad window open in the foreground. The Notepad window contains the following text, which is a copy of the device credentials from the table in the previous screenshot:

```
Organization ID qe3ow0
Device Type Nodemcu
Device ID 199795
Authentication Method use-token-auth
Authentication Token 1997199520012005
```

20. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar labeled 'Search by Device ID' is present. A table lists devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. One device is listed with ID 199795, Status 'Disconnected', and Device Type 'Nodemcu'. Below the table, a detailed view for the selected device is shown, featuring tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, displaying a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The bottom of the screen shows a Windows taskbar with the date and time as 8:11 PM on 9/17/2022.

This screenshot is similar to the one above, showing the IBM Watson IoT Platform dashboard. The device list table is the same. The detailed view for device 199795 is shown, but the 'Identity' tab is active instead of 'Recent Events'. The 'Identity' tab displays the following details: Device ID (199795), Device Type (Nodemcu), Date Added (17 Sep 2022 20:07), Added By (worldisfullofmeow@gmail.com), and Connection Status (Disconnected). At the bottom of the detailed view, it says 'Items per page: 50' and '1 of 1 page'.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

21. The Boards will display card for the project.

## RESULT:

An IBM Watson cloud for IoT and a device is created
